

Canada's online pharmacy

Serving All of Canada

Pocketpills serves over 200,000 members all across the country. We are the only online pharmacy that provides same-day delivery to over 15 million Canadians.

Pocketpills is also the only national online pharmacy with a presence in Québec and a bilingual app.

Free Delivery

Orders are shipped promptly and arrive directly at our members' doors. Privacy is of the utmost importance to our members, which is why we ship everything in discreet, unmarked packages.

More Ways to Engage

Our online presence allows us to engage more deeply with members throughout the prescription process and provide them with better end-to-end care. Members taking ongoing medication receive 7x more engagement with Pocketpills than with traditional pharmacies.

Pharmacists on Call

Pocketpills members can get in touch with our licensed Canadian pharmacists by phone, text, email, or live chat. Pharmacists are standing by to answer questions or give advice and help make the process as smooth as possible.

Pocketpacks

Members can choose to receive their medications and vitamins in pre-sorted daily dose packaging called Pocketpacks. These convenient packs can save time and prevent dosage mistakes by eliminating the need for vials, blister packs, and pill dispensers.

The extreme portability is great for travel and allows members to leave the house with doses in their pocket to take later in the day. Pocketpacks reduce the clutter of vials and bottles, which also helps our planet by reducing plastic waste.

Automatic Refills

A missed refill can have serious consequences. Pocketchills provides peace of mind and improve drug adherence with our automatic medication refills. We reach out to members when their supply is running low and schedule a refill to arrive at their door before they run out.

Fully Integrated

Pocketchills coordinates with insurers to provide members with smooth, cashless transactions. We can settle claims directly with our members' insurance companies thereby securing them the maximum coverage with the lowest possible copay.

Caregiver Feature

Members can manage the account of family and loved ones from their own Pocketchills app. With one-time authorization a user can view the account of a parent, grandparent or anyone else that needs their help to manage their prescriptions and vitamins.

Additional Coverage

Enhanced coverage for your employees and their dependents:

- **100% drug coverage for 6 months**
- **10% coverage ongoing**

Thank You
